in this account con
sho

this

to is

In this account of my early
men youth I wish particularly to
those circumstances tion which
led to and nourished my taste
for that science which was
the principal amusement of my
boyish days and in the end deci
. I mentioned before ded my destiny
my taste for old books of chemist
ry and natural magic and I remem
ber very well that I learned latin
principally that I might read
Pliny's Natural History my father
refusing to allow me to read a
translation. I used when very young
to attend lectures of chemistry
given in Geneva and although
I did not understand them the
experiments never failed to
attract my attention. I reme ber m
also w twelve

at the
record

and
the was heard at

induced and caused me to aply wi ith
ligence to the study of fresh di
natural philosophy which promised an ex- chemistry
i planation of th se sort of clamatio e

phænonema. On Elizabeth and
Clerval it produced a very different di
effect. They admired the beauty
of the storm without wishing to
analyze its causes. Henry said that
the Fairies and giants were at
war and Elizabeth attempted
a picture of it.
As I grew older my attempts
in science were of a higher nature.
I produced little earthquakes endeavou
and tried every kind of combination
and elements to ascertain of gasses to
the results.
As I before mentioned my brothers
were much younger than myself.
